

HASSAN KHABIBULLAEV

Technical Project Manager

hassan@khabibullaev.com · khabibullaev.com · linkedin.com/in/hassankhabibullaev

Technical Project Manager with 5+ years of cross-functional experience in software engineering, cybersecurity and other operations-related projects, pairing a hands-on technical background with the delivery discipline to keep engineering teams and stakeholders aligned. Twice promoted within two years while standardizing delivery governance across ~20 concurrent engagements and a 15-person technical team.

SKILLS

Project Methodology: Agile/Scrum, Kanban, technical program management, cross-functional delivery governance, roadmap ownership, milestone tracking, risk & dependency management, resource & capacity planning, release management

Tools & Platforms: Jira, Confluence, MS Project, automation & integration (Make.com, Zapier, custom scripting), AI productivity tooling (ChatGPT, Claude, Gemini)

Domain Knowledge: Cybersecurity (penetration testing, red teaming), software delivery lifecycle (SDLC), Technical fluency (HTML/CSS, JavaScript, Python, C#, Java, SQL)

Soft Skills: Cross-functional leadership, executive communication, technical & executive reporting, mentoring & team development, client & stakeholder management

EXPERIENCE

Group-IB

Jun 2024 - Present

Cybersecurity Services

Senior Project Manager

Jun 2026 - Present

- Direct end-to-end delivery of ~20 penetration testing and red teaming engagements, aligning a 15-person technical team with client stakeholders.
- Established delivery-governance processes (status tracking, risk ownership, escalation paths) that gave leadership real-time portfolio visibility and reduced status-reporting effort by 30%.
- Launched a quarterly deliverable & processes review cycle that ensured continuous improvement.
- Managed and mentored a team of 2 project managers and technical writers.

Project Manager

Jan 2025 - May 2026

- Introduced milestone tracking and risk reporting across ~10 concurrent projects, giving stakeholders clear visibility into status, risk, and deliverables and reducing schedule slippage by 90%.
- Standardized client-facing reporting templates across ~5 cybersecurity service lines, improving deliverable consistency and cutting review rework by 50%.

Technical Writer

Jun 2024 - Dec 2024

- Produced and refined technical documentation and client deliverables for ~50 cybersecurity engagements, ensuring accuracy and consistency under tight delivery deadlines.
- Surfaced process-optimization opportunities, which led to a promotion with ownership of project governance for the cybersecurity services team.

Global Friends

Aug 2021 – Jun 2024

Education Services

Operations Manager

Feb 2022 – Jun 2024

- Designed and implemented workflow automations across repeatable operational processes, eliminating several hours of manual work per day (~20 hours/week).
- Reduced document-generation and communication cycle time from ~5 minutes to under 1 second by automating contract, invoice, and email workflows.
- Developed an internal CRM that replaced spreadsheet-based tracking and centralized data for ~1,000 users, improving data accuracy and team efficiency.
- Trained and supervised ~5 new hires, standardizing onboarding to reduce ramp-up time.

Operations Assistant *(Part-time)*

Aug 2021 – Jan 2022

- Supported daily operations, documentation, and internal process management for the education services.
- Identified workflow bottlenecks and proposed automation opportunities later adopted by the team, earning a promotion within 6 months.

EPAM Systems

May 2021 – Jan 2022

Software Engineering Services

Junior Project Manager *(Part-time)*

Aug 2021 – Jan 2022

- Coordinated software-delivery tasks, documentation, and stakeholder communication across engineering teams in an Agile delivery environment.
- Improved project visibility by introducing structured coordination and status-tracking processes.

Intern, Web Frontend Development *(Part-time)*

May 2021 – Jul 2021

- Built and maintained front-end features for internal web platforms used by ~12 stakeholders, gaining hands-on engineering experience that informs technical delivery decisions today.
- Converted from intern to Junior Project Manager within 3 months based on performance.
